

To strengthen its R&D organization, Carlo Gavazzi Controls SpA is looking for the following position:

R&D Project Leader

Ref. RDPL_IT_2306

Responsibilities

- Analysis of the commercial specifications included in the CRS document provided by the Product Manager and support to improve the specifications by elaborating the use-cases
- Definition of the functional requirements necessary to fulfill the commercial specifications and the use-cases
- Analysis of the impact of functional requirements and use-cases on the SW/FW/HW and product architecture and definition of the functional requirements taking into consideration the production process
- Definition of the approach to develop and test (unit, integration), definition of the allocation of activities and detailed work plans, based on the master plan, definition and sharing with the team of the milestones (tagging, branching, testing) and assignment of the individual targets within the team
- Coordination of the activities related to the issue of detailed technical specifications, management of the review of technical specifications with the development team, and management of the technical documentation according to the previously agreed standards

Competences

- Deep knowledge of test, product specification and product development processes
- Deep knowledge of the field applications of the products
- Technical knowledge of the products (HW and/or FW and/or Standards)
- Knowledge of automatic/manual test environment design

Attitudes and skills

- Leadership, communication and analytical skills
- Systemic vision of problems
- Structured approach
- Good relational skills towards internal teams/departments
- Customer-oriented vision
- Workplace based in Belluno - Italy
