

Application note

Subject:
Saving time and energy costs in buildings with BACnet® control

Industry:
Energy and building efficiency

Product:
UWP 4.0

Customer:
System integrators, OEMs

CUSTOMER ISSUE

System integrators, OEMs and installers need a flexible solution for collecting metering and sensing data to the BMS (Building Management System) and control actuators via I/Os, using the BACnet® standard.

OUR SOLUTION

The combination of the UWP 4.0 with Carlo Gavazzi meters, sensors and actuators, plus the certified BACnet® gateway features, allow putting in place a flexible solution when the BMS integration is required in small, medium and large buildings.

BENEFITS

- As the UWP 4.0 is an EDGE controller and a BACnet® gateway, with embedded web-Server capability, secure remote VPN connection and a small form factor, it is the ideal platform wherever a scalable, flexible, future proof solution is needed.
