

R&D Project Leader

Ref. RDPL_IT_2311

Location: Belluno & Lainate (MI), Italy

About the job

Do you want to help build tomorrow's world? Welcome to Carlo Gavazzi, where we are designing, manufacturing and marketing electronic equipment. Our Group's products (sensors, monitoring relays, timers, energy management systems, solid state-relays, safety devices, fieldbus systems) provide automation solutions for the global markets of industrial and building automation across Europe, the Americas and Asia-Pacific through a network of 22 own sales companies and through more than 60 independent national distributors.

We currently are looking for talented and passionate R&D Project Leader like you, who can develop new, disruptive products together with our clients. Do you only strive for excellence and do you want to grow your career in step with our company? Then perhaps you're the M/F/X we're looking for.

You will be leading a multidisciplinary team of engineers on the development of innovative products. The aim of our passionate team is to cooperate with our clients in order to develop a unique product that is more advanced than anything that is currently available on the market. As an **R&D Project Leader**, you will lead one of our project team and work on new developments from A to Z.

What does this mean?

- You will analysis of the commercial specifications included in the CRS document provided by the Product Manager and support to improve the specifications by elaborating the use-cases
- You will define the functional requirements necessary to fulfill the commercial specifications and the use-cases
- You will analysis the impact of functional requirements and use-cases on the SW/FW/HW and product architecture and definition of the functional requirements taking into consideration the production process
- You will define the approach to develop and test (unit, integration), definition of the allocation of activities and detailed work plans, based on the master plan, definition and sharing with the team of the milestones (tagging, branching, testing) and assignment of the individual targets within the team
- You will coordinate the activities related to the issue of detailed technical specifications, management of the review of technical specifications with the development team, and management of the technical documentation according to the previously agreed standards

Sounds great! Am I the project leader you are looking for? Let's see:

- You have knowledge of hardware design principles, methods, tools, and techniques.
- You are passionate about test, product specification and product development processes and have knowledge of the field applications of the products & Technical knowledge of the products (HW and/or FW and/or Standards)
- You understand automatic/manual test environment design
- You have a higher degree in Engineering (BSC Electronics, ICT or the like).
- You have great leadership, communication and analytical skills and like people!
- You are flexible, you have no problems with adapting new plans. Product development is fun, but also unpredictable.

Benefits

Why should you apply?

- You will be joining a team of enthusiastic and passionate colleagues
- You will be working on the design and development of truly unique products, end-to-end. Yes, you can be an inventor! There is nothing more thrilling than seeing your work out there on the market
- Carlo Gavazzi is a fast-growing company, so you can grow with us and grow in your area of expertise or interest
- You will get an attractive salary package with a lot of extra benefits

And yes, Carlo Gavazzi is an award-winning company! We want to excel in what we do, it's no walk in the park but our hard work pays off.
