

Press Release

HEALTH AND SAFETY CERTIFICATION FOR OUR PRODUCTION SITE IN KAUNAS – LITHUANIA

This achievement marks another important step forward for Carlo Gavazzi in reinforcing its commitment to Health and Safety in the workplace.

Lainate, November 2024 - We are proud to announce that our production facility in Kaunas, Lithuania has successfully achieved the **ISO 45001:2018** certification.

ISO 45001 is an international standard for occupational health and safety (OHS) management systems, published by the International Organization for Standardization (ISO) in March 2018. Its primary goal is to reduce occupational injuries and diseases while promoting and safeguarding both physical and mental health in the workplace.

Achieving this certification is a comprehensive, multi-step process that typically takes around one year. It involves familiarization with the standards, documenting processes, audits, assessments, and employee training. The entire process was carried out by MS CERT/EQA, one of the most reputable organizations for ISO certifications.

This milestone is another significant step forward in reinforcing our commitment to protecting health and safety at work, and it underscores our dedication to the safe, sustainable manufacturing of high-quality products.

This certificate is available on the website under the section [Media Center/Download/ISO certifications](#)
